(a) Print even number between 0 to 99.

Step1:- Start.

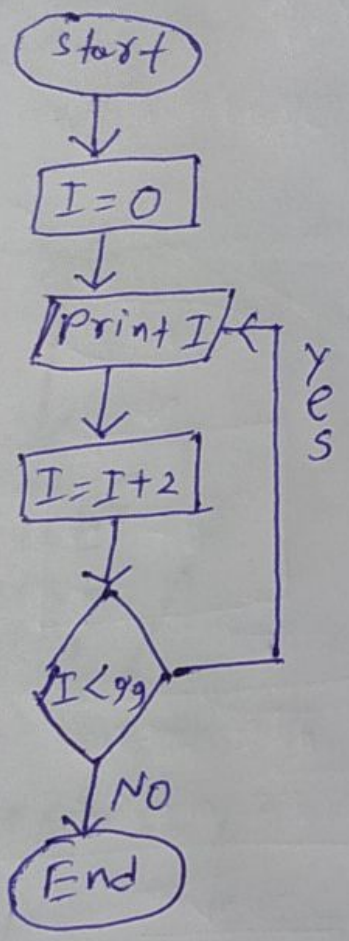
Step2:- I = 0

Step3:- Print the value of I.

Step4:- I = I + 2.

Step5:- If (I < 99) then go to step 3.

Step6:- End.



(b) print odd numbers less than a given number. It should also calculate their sum and count.

Step 1:- Start.

Step 2:- Input number.

Step 3:- I = N; S = 0

Step 4:- If (I % 2 != 0 and I > 0)

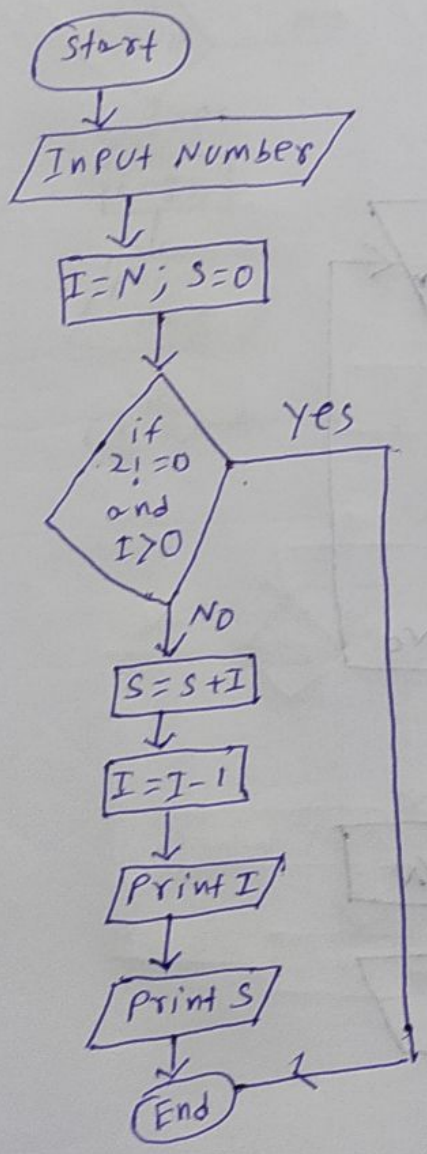
Step 5:- S = S + I

Step 6:- I = I - 1.

Step 7:- Print the value of I.

Step 8:- print S.

Step 9:- stop.



(c) Calculate the Average of 25 test score.

Step1:- Start.

Step2:- $I=1$, $N=25$, $S=0$.

Step3:- Input I'th exam score. x.

Step4:- $S=S+x$.

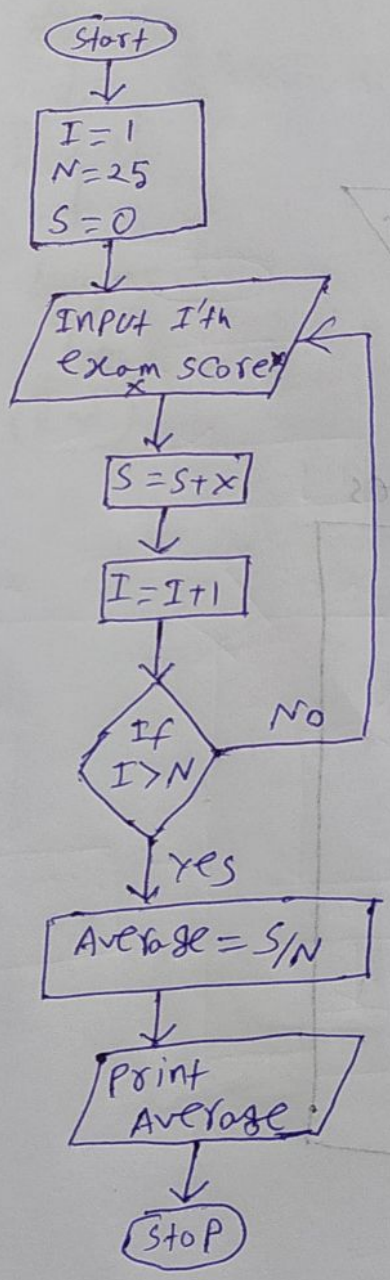
Step 5:- $I=I+1$

Step6:- If $(I>N)$ is not then goto step 3.

Step 7:- Average $= S/N$

Step 8:- print Average.

Step9:- stop.



(d) Print table of any number N (say 7)

Step1:- Start

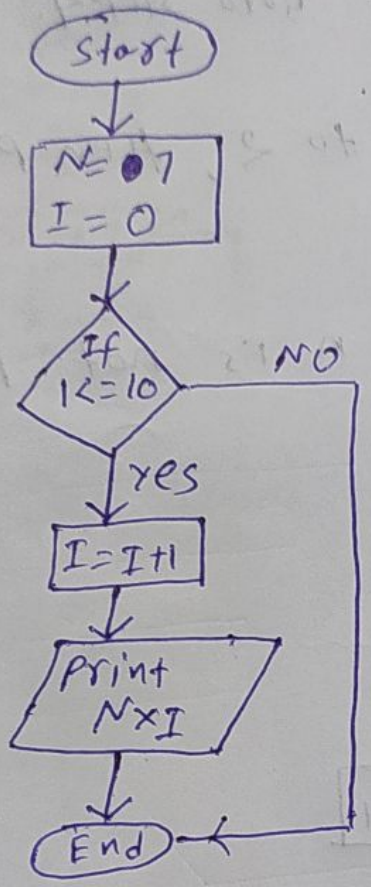
Step2:- N = 7, I = 0.

Step3:- If (I <= 10)

Step4:- I = I + 1

Step5:- print (N × I)

Step6:- stop



e

Check if the given number is prime or not.

Step1:- Start.

Step2:- Read number n.

Step3:- Initielise count ← 0 and i = 1;

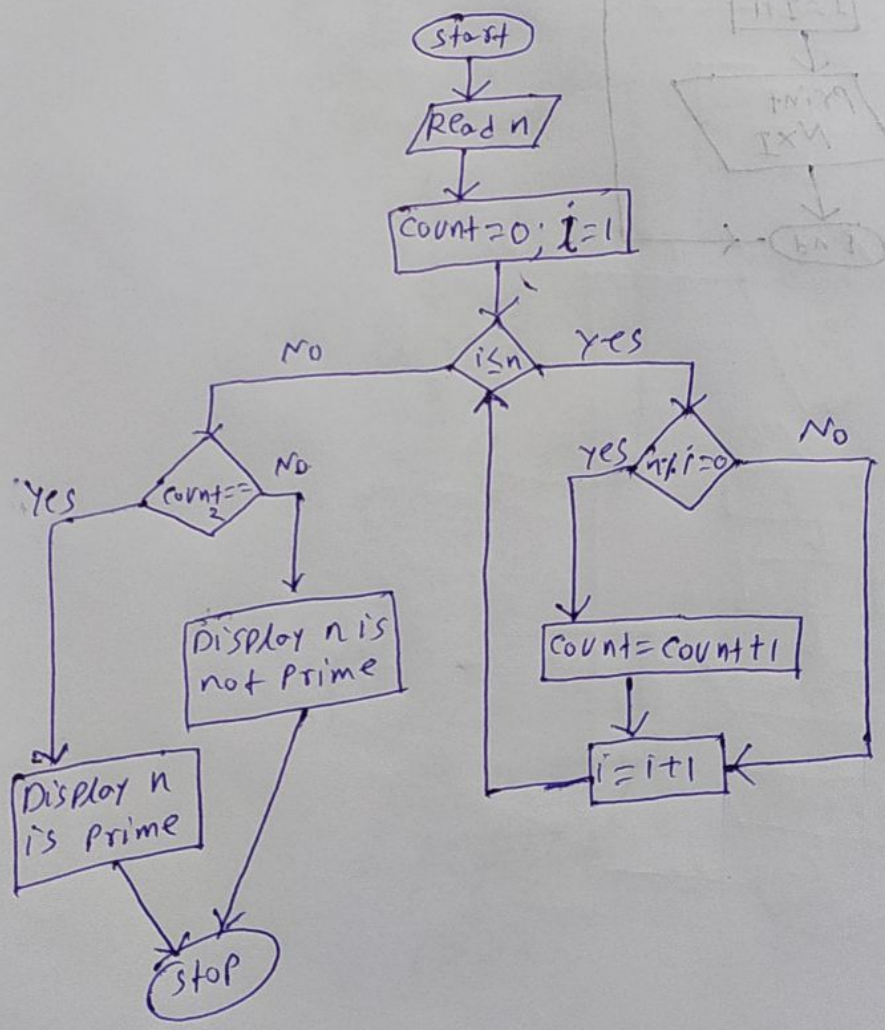
Step4:- Repeat step 5 untill i<=n, otherwise goto step 6.

Step5:- Divide n by i, if reminder is zero then increment count by 1. 1 by 1. Goto step 4.

Step6:- If count is equal to 2, then print n is prime, goto step 8.

Step7:- otherwise display n is not prime.

Step8:- Stop



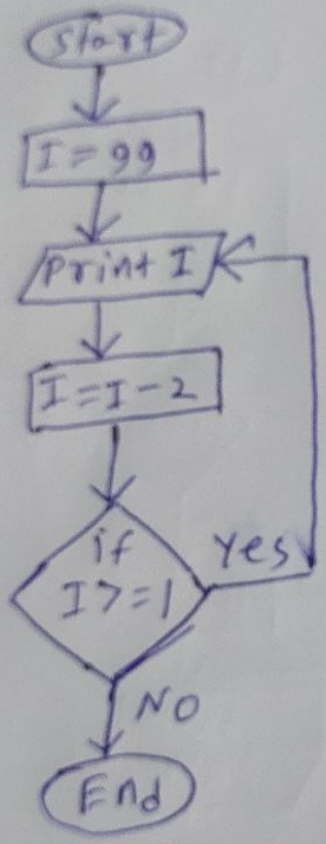
(f) Print odd numbers backward from 99 to 1.

Step1 :- Start

Step2 :- I = 99

Step3 :- Print I

Step4 :- I = I - 2

Step5 :- if (I >= 1) then goto step 3.


Step6 :- Stop
